Domestikacin

Antibiotic
Injectable solution

For vet use only

COMPOSITION:

Each 1 ml contains:
Amikacin 250mg (as sulfate)

PROPERTIES:

Amikacin is an aminoglycoside, semi-synthetic bactericidal antibiotic derived from kanamycin A. The mechanism of action is similar to that of other aminoglycosides, it acts by alteration of the protein synthesis of sensitive bacteria. Amikacin has abroad spectrum of action that includes numerous aerobic both Gram-negative bacteria(Pseudomonas aeruginosa, Escherichia coli, Proteus indolo positive and negative, Salmonella spp., Shigella spp., Klebsiella pneumoniae, Enterobacter spp.)and Gram positive bacteria (staphylococci, streptococci.)

Indication:

-Bacterial pneumonia or lung abscesses (adults) caused by Staphylococcus zooepidemicus, opportunistic aerobic pathogens, Streptococcus pneumoniae, Mycoplasma spp.)
-Bacterial pneumonia or lung abscesses (older foals) caused by staphylococcus zooepidemicus,
-Retained placenta caused by staphylococcus zooepidemicus, Coliforms

Target species:

Horses not intended for the production of food for human consumption.

Dosage and administration:

Route of Administration: intramuscular injection

Dose For Whole product:
0.8 ml to 1ml of the product / 20 kg body weight daily for the first day and once daily for the next 2-3 days.

Warnings & Precautions:

- use of the product deviating from the instructions given in the leaflet may increase the prevalence of bacterial resistant to amikacin and may decrease the efficacy of treatment with other classes of antimicrobials, due to potential cross-resistance.
- people hypersensitive to the active ingredient should avoid contact with the product.
-In case of accidental self-injection, seek medical advice immediately.

Contraindications:

-Do not administer to animals that have renal insufficiency.
- Do not use in case of hypersensitivity to the active ingredient or to any of the excipients.
- Do not use in case of ascertained resistance to the active ingredient.
- Do not administer in combination with other aminoglycosides, ototoxic drugs, diuretics, or anesthetics muscle relaxants.
- Do not use in Horses intended for the production of food for human consumption.

Adverse effects:

-Amikacin has a potential ototoxic and nephrotoxic effects.

Withdrawal time:

Not applicable : the product not to be administered to horses intended for the production of food for human consumption.

Storage conditions:

Store at temperature not exceeding 30°C. and to be Used immediately after opening.

Packaging:

Carton box containing transparent colorless glass (type II) vial containing 50 ml, 100 ml injectable solution closed with bromobutyl rubber stopper and flip off cap (aluminum cap with polypropylene plastic button) with an outer label and inner insert.
