Black

Size: 15 X 13.6 cm

Injectable solution

PICOFLUN

For vet use only

COMPOSITION:

Each 1 ml contains:

Florfenicol	300 mg
Flunixin (meglumine)	16.5 mg.

PROPERTIES:

Florfenicol is a synthetic, broad spectrum antibiotic active against many gram — positive bacteria isolated from domestic animals.

Florfenicol acts by inhibiting bacterial protein synthesis at the ribosomal level.

Flunixin is a potent, non-narcotic, non-steroidal, analgesic agent with anti-pyretic activity.

INDICATION:

Indicated for treatment of respiratory diseases caused by *Mannheimia haemolytica*, *Pasteurella multocida* and *Histophilus somni* associated with pyrexia.

TARGET SPECIES:

Cattle.

DOSAGE & ROUTE OF ADMINISTRATION:

By subcutaneous injection only:

Adult cattle: whole product: 2 ml / 15 kg body weight (once)

SIDE EFFECTS :

Mild, transient inappetence, decrease water consumption or diarrhea may occur in cattle following treatment . these symptoms should return to normal shortly after treatment.

CONTRAINDICATIONS:

Do not use in calves to be processed for veal.
Do not exceed 10 ml at any one injection site as greater than 10 ml may result in injection site residues that exceed approved limit at the withholding period.

Do not re-treat animals for 3 months after the last treatment.

This product is intended for use only in non-breeding beef cattle, including feedlot cattle and grass-fed steers and heifers.

WARNING & PRECAUTIONS:

The content of the vial should be used within 30 days after opening of bottle and discard any unused portion.

Keep out of reach of children.

WITHDRAWAL TIME:

Cattle Meat: 49 days

Do not use in cattle producing or may produce milk or milk products for human consumption.

STORAGE:

-Before Opening: Store at temperature not exceeding 30°C.

-After Opening: Used within 30 days when stored at temperature not exceeding 30°C.
